## **3ds Max 2010 32 Bit (x86) English Keygen ~REPACK~**

in addition to the seven core areas of instruction covered in the standards for english learners, the assessment of english learners (ael) encompasses two additional areas of instruction: literacy instruction (li) and subject matter instruction (smi). the ael and li/smi standards differ in that li is primarily concerned with the teaching of reading, writing, and basic numeracy, while smi refers to the learning of content areas such as science, social studies, and language arts. the standards for english learners are updated every four years as needed to reflect advances in the field. the last set of standards was developed in the early 2000s, and the next set will be developed in 2016. the common core standards are the foundation of our efforts to ensure that all students have access to an education that is rigorous and relevant to the world they will inhabit. we are all working so hard every day to keep the learning going as we shelter in place and it can often feel like an insurmountable challenge, but we need to move forward one small step at a time. my hope is that this document can serve as a support in making sure that our english learners dont become an afterthought or an educational casualty of this moment in history. as a state, we have made so many strides in these last few years to elevate and prioritize this essential and ever-growing part of our student population. my hope and plea is that we take this moment to look at our lesson plans, virtual learning experiences, and work packets through the eyes of our english learners and their families and make our best attempt to meet their learning needs. we are holding you and your students and families in our hearts as we move forward in this challenging moment.
